Pediatric Chronic Illness: A Hidden Epidemic

Nearly **1 in 5** U.S. children battle a disease for which there is no cure.

In the hospital there is a wealth of clinical and social-emotional support.

Before Bounce, there was an acute lack of support both at home & in the community.

Special thanks to Bowlero for partnering with us!

Together we created a space where families were able to not only enjoy bowling, but also:

- Didn't have to think about the struggles of chronic illness
- Got out of the house
- Made new friends & connections
- Built confidence & resilience
- Every family member was accommodated
- Nobody stared because people were "different"

Feel Safe Enough to Actually Leave Home

We are extra cautious of germs during the winter months, but having an event that is not open to the public makes us feel safer.

And hanging out with other Bounce families is always a treat!
