Pediatric Chronic Illness: A Hidden Epidemic

Nearly **1 in 5** U.S. children battle a disease for which there is no cure.

In the Hospital there is a wealth of clinical and social-emotional support.

What is a ***Bounce Back Kit (BBK)*** – and why does it matter?

Children battling chronic illness repeatedly face lengthy stays at home, especially before surgery, after treatment, and during flare-ups.

When doctor's orders or medical necessity cause "shut-in", boredom, frustration, and anxiety quickly set in. Holidays are especially hard – while the rest of the world is out celebrating, sick Kiddos and their families are stuck inside, alone and forgotten.

Designed to combat isolation and loneliness, every *BBK* contains crafts, STEM projects, custom-made activity books, snacks, and a signature item, which can be used over-and-over again, like a movie, book, or game – everything needed to have their own celebration!

Why a “Welcome to Bounce” *Bounce Back Kit?*

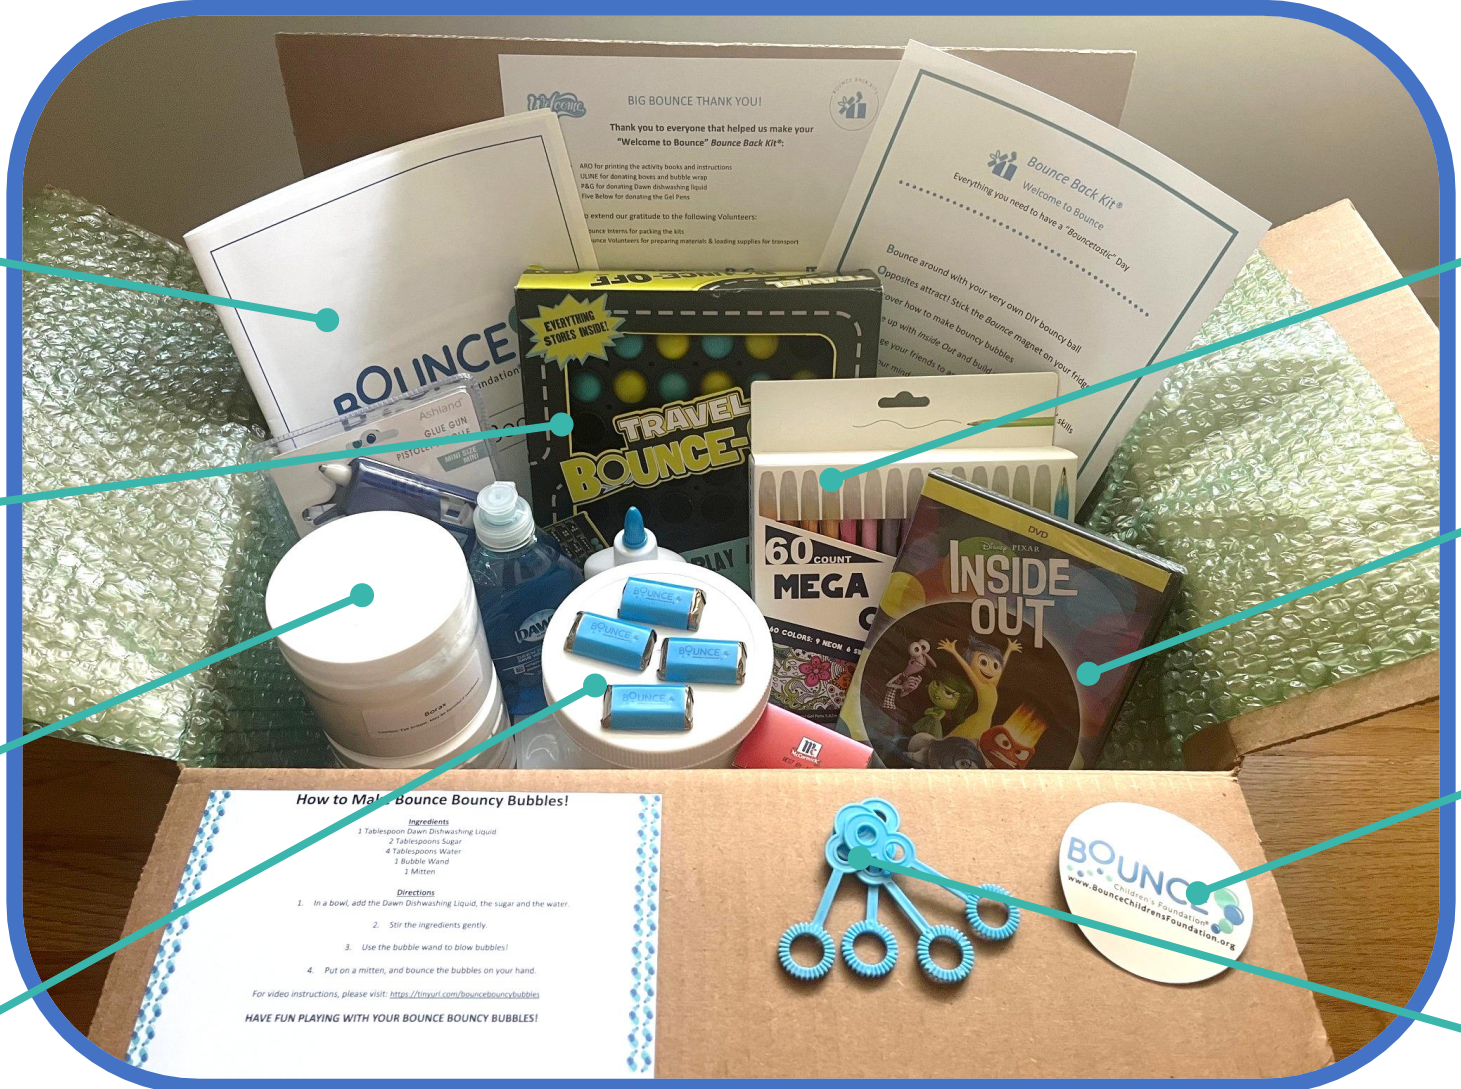

Welcome to Bounce *BBKs* are special care packages filled with all things Bounce-related. They are custom built for each new Bounce Family and sent to them as their first introduction to the Bounce Community, welcoming them with open arms.

The Welcome to Bounce *BBK* includes a fun signature item, treats, STEM activities, DIY arts and crafts, a snack, and a custom designed activity book. Also included are reusable supplies like gel pens, markers, tape, a glue gun, a hole punch, and other essentials they can grab and **use every time we send out new kits and activities.**

– in short, its everything needed to have a **“Bouncetastic” Day!**

Why *Inside Out*?

To shift from surviving to thriving, Bounce knows it's essential to **acknowledge** and **understand our emotions**.

Like the main character, Riley, we all experience a wide range of feelings, and each is important.

This movie is a staple signature item in our “Welcome to Bounce” *Bounce Back Kit*® because it beautifully illustrates how our emotions work together to help us navigate life. We learn from the characters that it's okay to feel all our emotions and that each one has a role to play.

Why Travel *Bounce Off*?

Kids who battle chronic illness are constantly being knocked down – and have to get back up again.

The game Bounce Off teaches kids to **work with their support system or team** to *Bounce Back* from whatever struggles they are facing.

Plus, the travel sized version of the game can go with them to doctor's appointments, therapies, hospital stays, and everywhere else!

Why Bouncy Bubbles & Bouncy Balls?

Who doesn't love bubbles?
Who doesn't love bouncy balls?

Why not make your own!

Bounce Back Kits are not only designed to provide distraction and connection, but also allow for some learning. DIY STEM crafts like Bouncy Bubbles and Bouncy Balls **mix fun and science** – and are a visual reminder that when they hit the floor, they can get back up.

“We were loading the car, heading out-of-town for a life-changing procedure. Just as we were about to drive away, UPS pulled up and handed us a box with a Bounce sticker on it. Our littlest asked, ‘How did Bounce know we were going to the hospital?’ We tossed the box in the trunk.

It rescued us.

Our healthy kids facetimed their brother while he was recovering, laughing and bonding over projects and activities. Despite being trapped in a hotel/hospital room, the kids all connected to support each other...

we were able to exhale.”
